

OIF Responsible Drawdown & Reset

AUSA Logistics Symposium

17 June 2009

MG Vincent E. Boles

Assistant Deputy Chief of Staff, G-4

Headquarters, Department of the Army

Thoughts For Discussion

OIF Responsible Drawdown

- Leveraging drawdown equipment to help improve Army readiness
- GEN Odierno drives order and pace of drawdown
- Physics behind redeployment and retrograde
- Retrograde priorities -- unit equipment vs. ARI equipment, AFG requirement
- Excess equipment accountability, disposition, and oversight
 - Non-Standard Equipment
 - GFE/Contractor Acquired Property
 - OCIE
- Maintenance triage in Theater for non-ARI TPE

Reset

- Accountability, visibility, and ARMT planning are catalysts for executing Reset during Return + 180
- Resetting separate/enabler units -- "IBUs"
- Operationalizing the enterprise approach -- FORSCOM ROC Drill currently on-going
